EXPERIENCE

Microsoft **Redmond, WA**
Software Engineer Nov 2020 – Apr 2024

- Developed a big-data pipeline with SCOPE script, increasing data validation accuracy by 30%.
- Improved a rate-limiting application's availability by 20% through robust cloud metrics and monitoring.
- Conducted a detailed QPS analysis on thousands of data shards. This identified 15% as under-provisioned and revealed opportunities for optimization.
- Added dynamic feeding for data shards in the pipeline. This helps scale shards with high QPS. As a result, system throughput improved, and resource allocation was optimized by 25%.
- I added advanced SDK control features to .NET Core apps. This improved the global user experience by 50%, leading to my promotion.
- Created a C# API for SharePoint data ingestion. It connects to three client systems, improving user file processing performance by 40%.
- Provided 24/7 support for 2 years and 12/7 on-call support for 1.5 years. This covered 5 critical backend distributed services, achieving 99.9% uptime.
- Mentored two interns on complex projects, securing their return offers.

Visa Inc **Austin, TX**
Software Engineer Sep 2019 – Oct 2020

- Built Python-Selenium automation suites, reducing testing time by 50% and manual effort by 60%.
- Created regression and volume testing procedures, improving product performance by 15%.
- Engineered Go-lang utility for EBCDIC-to-ASCII conversion, halving processing time.
- Designed Python classes for dynamic transaction file generation, achieving 100% testing accuracy.

Visa Inc **Austin, TX**
Software Engineer Intern Jun 2018 – Sep 2018

- Developed a Jira-like web app using Angular to streamline project tracking, increasing efficiency by 30%.
- Built interactive dashboards with D3.js and Charts.js for project visualization.
- Designed backend schemas with MongoDB and created mock services for development.

EDUCATION

Seattle University, Computer Science **Dec 2025**
Graduate Certificate Seattle, WA

University of Washington, Information School **June 2019**
Bachelor of Science in Informatics Seattle, WA

SKILLS

- **Languages**: Python, C#, Java, Go-lang, C++, JavaScript, SCOPE, SQL
- **Frameworks & Tools:** .NET, React, Angular, Docker, Git, Selenium
- **Cloud & Databases**: AWS EC2, Azure Data Factory, Azure Data Explorer, MySQL, KQL, COSMOS
- **Expertise**: Distributed Systems, API Development, Big Data Pipelines, CI/CD Practices

CERTIFICATIONS

- Harvard Business School Online CORe Credential of Readiness, **Summer 2023**
- The New Technologies (TNT) Mentor at Microsoft **Summer 2023**
- Microsoft Patent Award for "*Data Flow Control In Distributed Computing System*" **January 2022**
